application for leave of absence. ONE of the queerest cases that ever came before a court of law has just been heard by the Civil Tribunal of Complegue, France. A young and pretty lady named Simon put in a pica for divorce because of her husband's persistent neglect. She had, she said, been married to M Simon for more than two years, but he had been to her nothing more than a purely platonic husband. Maitre Marechaux, the counsel for M. Simon, protested strongly against the plaintiff's charges, and called the husband to prove that Mme. Simon had nothing to complain of. Madame Simon, however, insisted upon calling an expert in the person of Dr. Chevalter. who said that circumstances had come within his knowledge which led him to conclude that the lady had real cause for complaint, and that she might still, if necessary, wear the orange blossom with pride and honor. So far there was nothing very extraordinary about the case but the court was simply astounded when the lady added that she was a widow when she married M. Simon ; that she had been previously wedded to an old gentleman named Darane and that she had lived with him six months, bu under exactly the same conditions. The cour in rendering judgment, said: "In such delicate and truly mysterious case, they could not grant a div res upon the unsapported testimony of Dr. Chevaller regarding physicio ical The plaintiff was therefore non-ulted Poor Madame Simon is truly to be pitled-th victim of a succession of misfortunes.

LOS ANGELES, September 21st. It appears the news that the Chinese were being deported from Southern California in wholesale numbers, has been spread abroad throughout the East, and unemployed white men of every character and description seem to be flocking towards the West. On the Santa Fe overland train on Wednesday there arrived in this cliy nearly too men who came without money, giving it as their intention to take the places made vacant, by the deported heathens. The fellows came from virious points in the East and were altogether a hard looking lot. To-day they scattered out, visiting various portions of the city and suburbs, but manifested no particular desire to go to work right away. The police have been instructed to keep a sharp lookout over the actions of the unwelcome visitors, but in splic of their vigilance it is probable that there will be a large increase in the number of burglaries and petty crimes due to the presence of these unemployed men. It is reported that some of the city authorities of the East have made special arrangements with the railroad companies to transport the men free to the West in order to be rid of the undesirable element.
